Rameen Sahoo

SUMMARY

I am a Full-Stack Web and Mobile Developer that primarily uses HTML5, CSS3 and JavaScript with their relevant frameworks and databases. I have significant experience with user research and collaborating with developers to create web applications from the ground up. I maintain a detail-oriented mindset from 2+ years of experience in the tech industry.

EDUCATION

August 2021 – February 2022

Full-Stack Web and Mobile Development Certificate

Nucamp Coding Bootcamp

August 2014 – December 2018

- JavaScript/TypeScript
- Bootstrap
- React/Redux
- React Native
- jQuery
- Express
- JSON
- Git
- MongoDB
- Responsive Design
- SQL
- Adobe Creative Suite (Photoshop, Illustrator, InDesign)

PROFESSIONAL EXPERIENCE

2021 - Present

Full-Stack Web and Mobile Developer and UI/UX Designer (remote)

I started learning web development through Nucamp Coding bootcamp, and I've been developing different projects for the past year. I've created a personal portfolio with a combination of HTML/CSS/JavaScript frameworks, a counting app that's based on React, and a mock project about travelling to Africa, which primarily has bootstrap principles. All projects can be found on my GitHub. The URL to my personal website is also listed above.

2019 - Present

Clinical Research Data Coordinator (Seattle, WA)

I'm working with a team of clinical researchers in the Genitourinary Urology Medical Oncology Department at the University of Washington. We coordinate clinical trials that lead to the FDA approval of cancer treatments. I am specifically coordinating databases and ensuring to send information and query responses by appropriate deadlines.

2014 - 2015

Architecture, Construction and Engineering Intern at ACE Mentor Program of Washington (Kirkland, WA)

I was mentored by working professionals in careers centered around design, engineering, and construction to create a mock sustainable project with a group of ~30 students.
