PROFESSIONAL WORK EXPERIENCE

Full-Stack Developer, *Transmir LLC – Remote*

April 2019 - Present

- Developing and maintaining a responsive website and mobile application for a trucking company as the lead full-stack developer.
- Utilizing HTML, CSS and JavaScript to create and maintain the front-end of the website with over 50 feature-rich web graphics, animations, logos, and videos.
- Updating the back-end processes of the website with PHP and MySQL.
- Utilizing React Native to create an internal mobile application for logbook data, trucking schedules and company updates on a daily basis.
- Regularly performing quality assurance tests, and building custom APIs.
- Conducting efficient research towards new business scoping efforts with the team, which has resulted in the acquisition of 15 new employees, and various partners.

Clinical Research Data Coordinator, *University of Washington & Seattle Cancer Care Alliance – Seattle, WA*

October 2019 - April 2022

- Worked in the bladder and prostate cancer department in a cancer consortium with UW, SCCA and Fred Hutch.
- Worked on all clinical trial phases with a team of 15 clinical researchers, and 5 investigators.
- Managed over 50 protocols with 15+ different databases, and provided meticulous data management and query resolution on a daily basis.
- Collected and abstracted information from medical records and research charts, while adhering to clinical protocols, regulatory standards, and FDA guidelines.
- Requested and uploaded CT and MRI scans for all patients.
- Assisted with and attended local and external site meetings.
- Regularly communicated with external vendors and sponsors.
- Prepared for strict deadline-based and sponsor-driven monitoring visits or FDA audits.
- Trained 4 site staff as a mentor on EDC systems and protocols.
- Provided administrative and technical support as needed.
- Coordinated pharmaceutical drug accountability with Investigational Drug Services on a weekly basis.
- Assisted with processing laboratory samples (including blood, urine, and tissue samples) for tracking, storage, or shipping.
